

New Jersey Electronic Visit Verification Home Health Care Services

The code list below provides the final managed care codes for Home Health Care Services (HHCS) required for 1/1/2023 electronic visit verification (EVV) compliance per Section 12006(a) of the 21st Century Cures Act.

Codes in cohort 1 (skilled care) and cohort 2 (therapies) require the base code **and** place of service (POS) 12-home. The combination of the code and POS determine that the service requires EVV for payment. All modifiers will be accepted for skilled care and therapies when the correct POS code is provided. Codes in cohort 3 (ABA) are delivered with the modifiers as defined in the code details.

All services require a pre-authorization and POS 12 identifier for visit verification and billing.

EVV Home Health Care Services Codes:
